

Trend Micro™ Client Server Messaging Security for Small and Medium Business 3

Worry-Free Antivirus, Anti-Spam and Personal Firewall

Trend Micro™ Client Server Messaging Security for Small and Medium Business protects PCs, Windows™ servers, and Microsoft™ Exchange servers against viruses, spam and hackers in an all-in-one integrated defense.

Trend Micro Client Server Messaging Security for SMB introduces unique capabilities for businesses who demand a worry-free approach to security. With these Worry-Free Security features, Trend Micro solutions automate and dramatically simplify security.

Automatic Threat Protection is designed to eliminate the time and costs of manually dealing with viruses, spam and other malicious code, like a virtual 24/7 security IT staff.

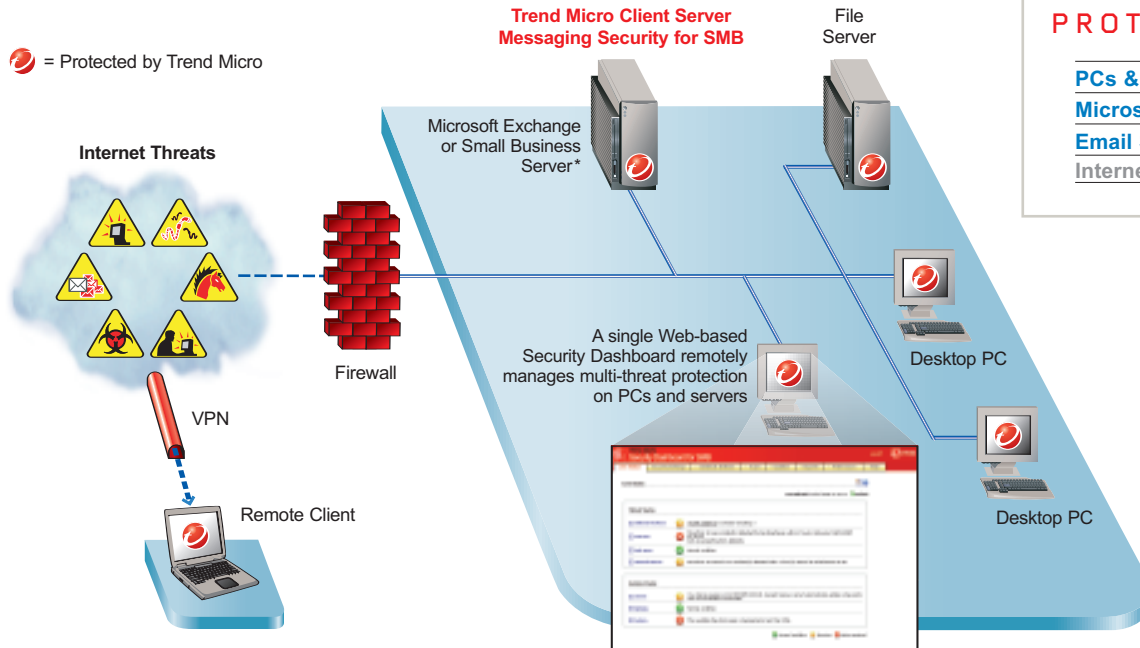

All-in-one Integrated Defense reduces the complexity and the effort necessary to protect your business from multiple Internet threats.

Zero Administration relieves you of managing security solutions so you can stay focused on your business.

Client Server Messaging Security for Small and Medium Business

1. Installs on a Windows Server
2. Automatically deploys security agents to networked PCs and servers
3. Provides centralized and remote management via Web-based Security Dashboard

* Can also be installed on a separate server

KEY BENEFITS

Automatic Threat Protection continuously protects business without intervention 24/7, like a virtual security team:

- Assesses vulnerabilities
- Prevents threats
- Protects the network
- Cleans up damage

All-in-One Integrated Defense provides unified defense against multiple threats with several security features:

- Antivirus
- Anti-Spam
- Anti-Phishing
- Email Content Filtering
- Personal Firewall
- Virus Vulnerability Assessment

Zero Administration proactively delivers critical information to administrators:

- Real-time alerts
- At-a-glance live status
- Detailed pulse-point reporting

PROTECTION POINTS

PCs & Laptops	✓
Microsoft Windows Servers	✓
Email Servers	✓
Internet Gateway	-

Trend Micro™ Client Server Messaging Security for SMB 3

Trend Micro Client Server Messaging Security for SMB provides advanced protection while simultaneously reducing the burden on limited IT resources.

All-in-one Integrated Defense

- **Multi-threat:** Protects against viruses, worms, Trojans, spam, phishing, and hackers.
- **Multiple protection points:** Defends PCs, laptops, email servers, file servers and 64-bit computers.
- **Single Install:** Deploys unified defense with a single install.

NEW! Automatic Threat Protection

- **Assess:** Finds and reports on protected systems vulnerable to virus exploits and outbreaks.
- **Prevent:** Defends protected computers from threats before virus signature is available.
- **Protect:** Initiates a network-wide virus scan after updates.
- **Clean up:** Cleans up after outbreaks without using a special tool or visiting each computer.

Anti-Spam

- **NEW! End-User Quarantine Option:** Places spam in end-user quarantine mailboxes so users can review tagged email without IT help.
- **NEW! Filtering by Spam Category:** Increases detection accuracy by enhancing control of spam filtering to include categories such as pornography, financial, medical, and custom.
- **Detection and Blocking at Mail Server:** Provides heuristic anti-spam engine and signature matching, which stop spam and suspect files at the mail server, before they reach user mailboxes.

NEW! Personal Firewall

- **Firewall Protection:** Defends network computers from malicious code and hackers, inside the network and on the road.

NEW! Zero Administration

- **Web-based Security Dashboard:** Single console provides remote management and troubleshooting from any PC with an Internet connection.
- **Real-time Alerts:** Sends custom alerts when attention is needed.
- **Real-time Status:** Displays at-a-glance protection status and detail on threat activity, top vulnerabilities and outbreak information.
- **Reporting:** Automatically emails HTML reports on threat activity and effectiveness of protection.

SYSTEM REQUIREMENTS

Security Server

Required server offers central management of Client Server Messaging for SMB.

- Can be installed on the same server as Microsoft Exchange
- 733 MHz Intel™ Pentium™ III or equivalent
- 512 MB RAM
- 1.5 GB Disk Space
- OS: Microsoft Windows 2000 SP2, XP SP1, 2003, or Microsoft Small Business Server 2000, 2003
- Web server: Microsoft Internet Information Services (IIS) 5.0, 6.0, or Apache™ 2.0.54
- Web Console: Microsoft Internet Explorer 5.5

Email Servers

Messaging Server Agent deploys to protect email server.

- Microsoft Exchange 2000 SP3, 2003, 5.5 SP4

PCs and Servers

Client Server Agent deploys to protect PCs or servers.

- 300 MHz Intel Pentium II or equivalent
- 128 MB RAM
- 80 MB Disk Space
- OS: Microsoft Windows 98SE, ME, NT4 SP6a, 2000 SP2, XP, 2003, or Microsoft Small Business Server 2000, 2003
- Gigabit Network Interface Card (NIC), and tablet PCs supported

For 64 bit servers.

- Intel Itanium-based systems; or AMD Athlon™ 64, AMD Opteron, Intel Xeon with Intel EM64T support, or Intel Pentium 4 with Intel EM64T support
- 128 MB RAM
- 80 MB Disk Space
- OS: Microsoft Windows XP Pro x64, 2003 x64, 2003
